

NOISE RESTRICTIONS

In order to be a good neighbor and to protect this wonderful site, EESCC reminds all drivers of the following regulation:

*******There is a 97db noise limitation at all EESCC autocross events.**

Noise will be monitored consistent with SCCA rules.

If the car is recorded with a 94 - 97db reading the driver will be given a warning.

If the car is recorded with a 98db or greater reading the driver will be asked to modify the car in some manner before another run is allowed.

If the car records another run at 98db or greater, the car will not be allowed to run again that day and that run will be scored a DNF.

No refunds will be given.

*******Please make sure your cars are under the limit. Thank you for your cooperation.**
